STATISTICS OF CANADA.

CENSUS OF 1870-71.

INTRODUCTION.

VOLUME THIRD.

The twentieth Table, the first of this volume, gives an account of the total number of acres of land owned by the residents of each Census District, and also of the number and tonnage of ships owned by the population of each District. It is the general statement of the landed and maritime property, according to the residence of the proprietors but irrespective of the situation of the property.

In reference to the lands, the difference between the superficies by the first column of Table XX and the total superficies occupied according to Table XXI, shows the number of acres of wild land belonging to individuals, but not forming part of the farm holdings.

The number of ships and the amount of tonnage shown by Table XX, represent the number of ships and the actual tonnage owned by residents of Canada, whether the ships were built abroad, or were launched from Canadian ship yards. These figures have no connection with those given by the Registry of Ships built in Canada, which may, and in fact, have, in large numbers become the property of persons living abroad.

For instance, on one side, the amount of tonnage held by Canadians in the large iron steamships of our Oceanic Lines, although these are built and registered in the British Isles, is shown in this Table because owned by Canadians; on the other hand, the numerous ships built in our yards or registered here and sold to others than Canadians do not appear in the Table, from the fact of their being owned abroad.

STATISTIQUES DU CANADA.

RECENSEMENT DE 1870-71.

INTRODUCTION.

TROISIÈME VOLUME.

Le Tableau XX, premier de ce volume, rend compte du nombre total d'Acres de terres possédés par les habitants de chaque district de recensement et du nombre et du tonnage des Navires aussi possédés par la population de chaque district. C'est le cahier général de la Propriété Foncière et de la Propriété Maritime, eu égard à la résidence des propriétaires et indépendamment de l'endroit où se trouve situé l'immeuble possédé.

Quant aux terres, la différence entre la superficie portée à la première colonne du Tableau XX et la superficie totale occupée, portée au Tableau XXI, donne le chiffre des acres de forêts primitives appartenant à des particuliers, mais ne faisant point partie des exploitations agricoles.

Le nombre des Navires et les chiffres du Tonnage inscrits dans le Tableau XX expriment le nombre de navires et l'effectif du tonnage possédés par les habitants du Canada, soit que les navires aient été construits à l'étranger et achetés par leurs propriétaires actuels, ou que ces navires soient sortis des chantiers canadiens. Ces chiffres n'ont aucun rapport avec les chiffres donnés par l'enregistrement des navires construits en Canada, lesquels peuvent être devenus et sont de fait, en grand nombre, devenus la propriété de personnes étrangères au pays.

Ainsi, d'un côté, les grands navires de fer à vapeur de nos lignes océaniques, bien que construits et enregistrés dans les Iles Britanniques, sont portés dans ce Tableau, pour la part que les Canadiens ont dans ces navires ; d'un autre côté, les nombreux navires, construits dans nos chantiers ou enregistrés en Canada et vendus à d'autres qu'à des Canadiens, sont exclus de ce tableau, parce que ces navires sont devenus propriétés étrangères.

With regard to Table XXI it should be pointed out that the words "*Occupants of so many acres and total extent occupied*" applied in detail do not imply that the fields belonging to each holding are necessarily in one unbroken lot. In general it is so, but not unfrequently it is otherwise. In many cases certain parts of a holding are situated in a sub-district or even in a Census District other than that in which the occupant resides and in which, consequently, these parts are entered. This takes place especially in the old settlements and particularly in the case of wood lots which may be at some distance and are sometimes several miles away from the farm holding.

Tables XXII and XXIII require no particular explanation.

With regard to the second part of Table XXIV, containing an account of the products of fur bearing animals, it is well to note that in certain cases, which, however, are not very numerous, the product is entered in a different District from that in which the animals were caught, on account of the residence of the hunter and the impossibility of indicating precisely the district of his operations. The same remarks apply also to some cases in the other Tables. The general rule with respect to manufacturing industries is, that raw materials are not produced in the District or sub-district in which they are worked up, a great portion, or even the whole, of such raw material being brought from other Districts, other Provinces or imported from abroad.

In Table XXV (Products of the Forest) as in all the Tables of this volume, the figures show collectively the whole of the articles produced, extracted or manufactured, which include all the quantities absorbed by home consumption, as well as those exported or held in reserve, being the grand totals of the production for the twelve months between the 2nd April, 1870 and the 2nd April, 1871.

The differences existing between one Province and another, and even between one part of a Province and another, in the mode of counting saw logs, has necessitated the employment of a particular standard. The standard employed in the Census, consists in counting as a log that which can produce 100 feet of lumber in board measure; that is, 100 feet superficies of boards one inch thick.

In Table XXVI (Fisheries) the returns are given by Districts only, whenever the Products of the Fisheries are of secondary importance, and by Districts and Sub-Districts, for those parts of the country in which this branch of industry is of great importance. The barrel of fish mentioned in the returns is equal, on the average, to two hundred pounds weight.

In the reports from which Table XXVII has been compiled, copper and iron ores are brought to a common standard of 25 per cent of metal. The square of slate signifies a quantity capable of covering 100 feet of roof; the mass varies according to the dimensions adopted for the pieces.

Tables XXVIII to LV, contain the results of the enquiry regarding manufactures to which the Census gave rise. They apply to all industries of any importance conducted in separate establishments or work shops, *ad hoc*. These Tables do not include the pro

Il est nécessaire de faire remarquer, relativement au Tableau XXI, que les mots —*Occupants* de tant d'acres et *Étendue totale occupée*,—appliqués dans le détail, n'impliquent pas que les champs appartenant à chaque exploitation soient nécessairement d'un seul tenant. En général, il en est ainsi ; mais assez fréquemment il en est autrement. Certains champs de l'exploitation sont souvent situés dans un sous-district et même dans un district de recensement autre que celui dans lequel réside l'occupant, et dans lequel ces champs se trouvent par conséquent inscrits. Cela a lieu surtout dans les anciens établissements et particulièrement par rapport à des terres à bois, attachées aux exploitations, mais sises à distance et quelquefois même à des distances éloignées de plusieurs milles.

Les Tableaux Nos. XXII et XXIII ne demandent point d'explications particulières.

Relativement à la seconde partie du Tableau XXIV, qui contient le compte-rendu des produits de la chasse des animaux à fourrures, il convient de noter que, dans certains cas, peu nombreux cependant, le produit est inscrit dans un district autre que celui dans lequel a eu lieu la capture, à cause de la résidence du chasseur et de l'impossibilité d'indiquer précisément le district de ses opérations. La même remarque s'applique aussi à quelques cas dans les autres Tableaux. Quant à ce qui concerne les industries manufacturières, la règle générale est que les matières premières ne sont pas produites dans le district ou sous-district dans lequel s'opère la transformation : ces matières en grande partie ou en totalité viennent d'autres districts, d'une autre province et quelquefois même de l'étranger.

Dans le Tableau XXV (Produits des Forêts), comme du reste dans tous les Tableaux de ce volume, les chiffres expriment l'ensemble et la totalité des objets produits, extraits, ou manufacturés, tant les quantités absorbées par la consommation intérieure que les quantités exportées ou tenues en réserve, étant la production, grand total, des douze mois écoulés depuis le 2 avril 1870 jusqu'au 2 avril 1871.

La différence qui existe d'une province à l'autre et même d'une partie de province à une autre, dans le mode de compter les billots de sciage a nécessité l'emploi d'un étalon particulier. L'étalon adopté par le recensement consiste à compter pour un *billot*, ce qui est capable de produire 100 pieds de bois de sciage, en mesure de planche ; c'est-à-dire 100 pieds de superficie de planches ayant un pouce d'épaisseur.

Dans le tableau XXVI (Pêche) les retours sont donnés par districts seulement partout où les produits de la pêche n'ont qu'une importance tout-à-fait secondaire, et par districts et sous-districts pour les parties du pays où ce genre d'exploitation atteint une grande importance. Le baril de poisson mentionné dans les retours est égal, en moyenne, à 200 livres de poids.

Dans les rapports qui ont servi à faire le Tableau XXVII, les Minerais de cuivre et de fer sont rapportés à un étalon commun de 25/00 de métal. Le carré d'ardoise signifie la quantité d'ardoise capable de couvrir 100 pieds de toiture ; la masse varie selon les dimensions adoptées pour les pièces.

Les Tableaux XXVIII à LV sont le compte-rendu de l'enquête manufacturière à laquelle le recensement a donné lieu. Ils s'appliquent à toutes les industries de quelque importance, dont les travaux sont conduits dans des établissements séparés ou des bou-

ducts of domestic industries such as building, furniture making, clothing, tools, boat and carriage building, &c., done by the farmers and among the sea-side population, which in general cannot be separately classified. It is proper to remark that the importance of this unclassified industry is considerable, especially in the Maritime Provinces and in the Province of Quebec. To give an idea of it, it is sufficient to refer to Table XXIV in which will be found the quantity of woollen and linen cloth made by the families of the farmers, which amounts to 7,641,917 yards for woollen cloth, and to 1,771,140 yards for linen fabrics, that is, to a total value closely approximating to that produced by all our large manufactories of textile fabrics together.

The Industrial Establishments have been divided into five series and classed in the text by alphabetical order in English. The alphabetical order in French will be found in the analytical table of contents at the end of this volume. The first series includes establishments to be found in each District, placed together on account of the number of establishments in each category. But the division into series has no importance except that of convenience in the distribution of space and facility of reference to the details of the Industries in the other tables, from Table LV, which contains the recapitulation of all the Industries by Provinces.

In Canada, the division of labour is not carried to the same extent as in the older societies of Europe and in the same establishments there are often to be found grouped together several branches of industry, information regarding which it is impossible to present separately. The study of the occupations of the population may be completed by comparing Table XIII, second volume (which gives a statement of the professions), with the Tables of this volume which shows the number of persons employed in each industry, of whatever kind.

Thus, it appears by Table XIII (second volume, page 237), that there are 18,362 fishermen by profession, and by Table XXVI (third volume, page 268), that nearly 40,000 individuals contribute to the fisheries or to work connected with them. The excess includes the number of persons who, without being fishermen by profession, have yet brought a certain amount of labour to the business of catching and preparing fish during the year 1870. It is likewise so in the case of many manufacturing industries.

In considering the reports of the industries, it may be further remarked that certain establishments do not employ the workmen or labourers during the whole year, nor in a regular manner and that men following certain occupations are successively engaged in the course of the year in various employments. The item of annual wages compared with the number of men employed is, consequently, not a fair indication, in many establishments, of the rate of pay for the day's work; but the addition of the column of wages in Tables LIV and LV to the grand total of the salaries of all kinds, paid by the industries carried on in establishments or workshops *ad hoc*.

In Table I are grouped the figures representing the capital invested, the number of hands employed, the amount of wages, the value of raw material, and the total values

tiques *ad hoc*. Ces tableaux ne comprennent pas les produits de la confection domestique, tels que les travaux de construction, de meublerie, d'habillement, d'outillage, de chalouperie, de carrosserie, et autres, exécutés chez les cultivateurs et au sein des populations de la côte, laquelle confection, en général, échappe à l'analyse. Il est juste de remarquer que l'importance de cette industrie non titrée est considérable, surtout dans les provinces maritimes et dans la province de Québec. Pour en avoir une idée, il suffira de recourir au tableau XXIV, où l'on a inscrit le chiffre des tissus de laine et de lin confectionnés par les familles agricoles; chiffre qui s'élève 7,641,917 verges pour les étoffes de laine, et à 1,771,140 verges pour les tissus de lin; c'est-à-dire à une valeur totale voisine de celle produite par toutes nos grandes manufactures de tissus prises ensemble.

Les Etablissements Industriels ont été partagés en cinq séries, et classés par ordre alphabétique du texte anglais, dans chaque série. L'ordre alphabétique en français se trouve inscrit dans la table analytique des matières, à la fin de ce volume. La première série comprend les établissements qui se rencontrent partout, dans chaque district, et ainsi de suite, en raison du nombre des établissements de chaque catégorie, par ordre de fréquence. Du reste, cette division par séries n'a pas d'autre importance que celle de la commodité dans la distribution de l'espace et de la facilité de référence du tableau LV, qui renferme la récapitulation de toutes les Industries, par Provinces, aux détails de ces mêmes industries dans les autres Tableaux.

La division du travail n'est pas en Canada ce qu'elle est dans les vieilles sociétés de l'Europe et souvent le même établissement voit réunies ensemble plusieurs branches d'industries qu'il est en conséquence impossible de présenter séparément. L'étude des occupations de la population se complète par l'examen du Tableau XIII (second volume) qui donne un état des professions comparé avec les tableaux de ce troisième volume qui établit le nombre des personnes employées dans chaque industrie, à quelque titre que ce soit.

Ainsi, on voit dans le Tableau XIII (2ème volume page 337) qu'il y a 18,362 pêcheurs de profession, et au Tableau XXVI (3ème volume page 258) que près de 40,000 individus ont contribué à la pêche, ou aux travaux accessoires qu'elle entraîne; l'excédant comprend le nombre de personnes qui sans être pêcheurs de profession, ont cependant apporté une certaine somme de travail dans la prise et la préparation du poisson de l'année 1870. Il en est ainsi pour beaucoup d'industries manufacturières.

Dans l'appréciation des rapports des industries, il faut encore remarquer que certains établissements n'emploient pas leurs ouvriers ou travailleurs toute l'année, ni d'une manière régulière et que les hommes de certaines occupations sont, dans le cours de l'année, successivement employés à diverses industries. L'item des salaires annuels comparé au nombre d'individus employés, par conséquent, pour beaucoup d'établissements, ne saurait être une indication du prix de la journée ouvrière; mais l'addition de la colonne des salaires aux Tableaux LIV, et LV, est le grand total des salaires de toutes sortes payés par les industries qui s'exercent dans des établissements ou boutiques *ad hoc*.

Dans le Tableau LIV on a groupé les chiffres qui représentent le capital engagé, le nombre de bras employés, le montant des salaires, la valeur des matières premières et les

of the products of all the industries for each Census District. This table, then, gives for each District, in a collective form, the principal elements of all the manufacturing industries carried on in separate establishments.

Table I.V contains the recapitulation of the industrial values of each industry for each Province, and for the four Provinces united.

It is necessary to observe that, in the report of Distilleries, the heavy excise duty imposed on spirits per gallon, is added up in the column of the total value of products.

Two Indexes of Districts, one in numeral and the other in alphabetical order, will be found at the end of the volume. These two Indexes may be used in connection with the large Index of sub-Districts placed at the end of the first volume. Also an Alphabetical Table of Contents, in which all the subjects treated of in this volume are separately indicated.

valeurs totales des produits de toutes les industries pour chaque district de recensement. Ce tableau donne donc pour chaque District l'ensemble des éléments principaux de toutes les industries manufacturières qui s'exercent dans des établissements séparés.

Le Tableau LV contient la récapitulation des Valeurs Industrielles de chaque industrie pour chaque Province et pour l'ensemble des quatre Provinces.

Il est nécessaire de faire observer que, dans le rapport des valeurs produites par les Distilleries, le fort droit d'accise frappé par gallon sur les spiritueux est additionné dans la colonne de la valeur totale des produits.

Deux Index des Districts, l'un par ordre de numéros, et l'autre par ordre alphabétique se trouvent à la fin du volume. Ces deux Index se rapportent au grand Index des sous-districts placé à la fin du premier volume.

Le tout se termine par une Table alphabétique des Matières dans laquelle sont séparément indiqués tous les sujets qui sont traités dans ce volume.

ÉTABLISSEMENTS INDUSTRIELS.

5ÈME SÉRIE.

Fabriques de poudre-levain.
Fabrique de billets de banque.
Fabriques d'extrait pour tanner.
Fabriques de cloches.
Fabriques de soufflets.
Fabriques de courroies de manches de pompes.
Fabriques de tables de billard.
Fabriques de cirage.
Moulins à broyer les os.
Fabriques de boutons.
Fabriques de ciment.
Fabriques de bouchons.
Filatures de coton.
Coutellerie.
Fabriques de coffres-forts.
Fabriques d'outillage de pêche.
Fabriques d'objets divers de cuivre, fer, plomb, &c.
Fabriques de toile à parquet.
Fabriques de fusées.
Verreries.
Fabriques de colle-forte.
Fabriques de meules à aiguiser.
Fabriques de poudre à tirer.

Fabriques d'objets de caoutchouc.
Fabrique d'objets de style sauvage.
Fabrique d'encre.
Fourneau à réduire le fer, et fabrique de l'acier.
Fabriques de formes à chaus-sures.
Fabriques de tuyaux de plomb.
Fabriques d'huile de lin.
Fabriques d'instruments de mathématiques.
Fabriques de matelas.
Fabriques de clous et brochettes.
Fabriques d'habits huilés.
Fabriques de seaux et cuves.
Fabriques de cols de papier.
Fabriques d'ouvrages de plâtre et stuc.
Moulins à plombagine.
Fabriques de briquettes de tourbe.
Moulins à broyer le quartz.
Fabriques de chars pour chemins de fer.
Fabriques de rivets.

Lamineries.
Fabriques de feutre à toitures.
Fabriques de papier sablé.
Fabriques de balances.
Fabriques d'ardoises d'écoles.
Fabriques de machines à coudre.
Fabriques d'appareils de navires.
Fabriques de boîtes d'emballage.
Fabriques de patins.
Fabriques de blutoirs.
Fabriques de pointes et chairs pour chemins de fer.
Fabriques de ressorts et essieux.
Fabriques d'amidon.
Raffineries de sucre.
Appareils de chirurgie.
Fabriques de tentes.
Fabriques de pipes.
Fabrique de térébenthine.
Fonderies de caractères d'imprimerie.
Vinaigreries.
Fabriques de cierges.
Fabriques de jalousies.
Fabriques de fouets.

			\$		\$	
2	Furriers and Hatters, &c	Pelleteries, chapelleries, &c	145,875	550	513,189	
5	Fuse Factory	Fabriques de fusées				
4	Gas Works	Fabriques de gaz	965,900	113	263,206	
5	Glass Works	Verreries	22,000	98	112,330	
5	Glue making	Fabriques de colle-forte	3,400	17	6,200	
4	Gold and Silver Smithing	Orfèvrerie	10,200	18	34,900	
5	Grindstone Works	Fabriques de meules à aiguiser				
5	Gunpowder Mills	Fabriques de poudre à tirer	24,000	13	60,000	
4	Gunsmithing	Armurerie	14,400	32	18,587	
4	Gypsum Mills	Moulins à plâtre	57,950	124	96,304	
4	Hosiery Manufactories	Bonneterie	52,500	244	198,642	
5	India Rubber Factories	Fabriques d'objets de caoutchouc	600	2	7,000	
5	Indian Manufactures	Fabrique d'objets de style sauvage	65	42	1,710	
5	Ink Factory	Fabriques d'encre				
5	Iron Smelting Furnaces and Steel making	Fourneaux à réduire le fer				
2	Jewellers and Watch Makers	Bijouterie et horlogerie	73,405	235	210,183	
2	Last Factories	Fabriques de formes à chaussures	8,250	24	18,787	
2	Lead Pipe Works	Fabriques de tuyaux de plomb				
1	Lime Kilns	Fours à chaux	64,197	1,099	265,883	
5	Linseed Oil Factories	Fabriques d'huile de lin	200	1	112	
4	Match Factories	Fabriques d'allumettes	4,565	41	14,660	
5	Mathematical Instrument making	Fabriques d'instruments de mathématiques	2,560	8	6,600	
5	Mattress making	Fabriques de matelas	1,350	13	18,160	
2	Meat curing	Salaisons de viande	337,525	661	3,193,122	
3	Miscellaneous Wares	Fabriques d'articles variés	69,843	245	252,736	
4	Musical Instrument making	Fabrique d'instruments de musique	147,100	387	496,012	
5	Nail and Tack Factories	Fabriques de clous et de brochettes	8,000	16	22,000	
5	Oil Clothing Establishments	Fabriques d'habits huilés				
3	Oil Refineries	Epuration de l'huile	524,949	433	2,845,669	
5	Pail and Tub Factories	Fabriques de seaux et cuves				
4	Paint and Varnish Works	Fabriques de peinture et de vernis	9,700	6	12,700	
2	Painters, Glaziers, &c	Etablissements de peintres en bâtiment	27,571	279	208,304	
5	Paper Collar Factory	Fabriques de cols de papier				
4	Paper Manufactories	Fabriques de papier	357,900	344	487,500	
4	Patent Medicine Manufactories	Fabriques de médecines brevetées	42,500	60	98,750	
2	Photographic Galleries	Etablissements de photographes	87,744	194	172,084	
5	Plaster and Stucco Factories	Fabriques d'ouvrage de plâtre et de stuc	3,270	29	24,700	
5	Plumbago Mills	Moulins à plombagine				
2	Pot and Pearl Asheries	Potasseries	116,946	598	391,655	
3	Potteries	Poteries	63,772	207	186,405	
5	Prepared Peat Fuel Factories	Fabriques de briquettes de tourbe				
4	Preserved Articles of Food	Fabriques de conserves alimentaires	2,500	24	3,500	
2	Printing Offices	Imprimeries	981,060	1,784	1,907,067	
2	Pump Factories	Fabriques de pompes	60,264	262	169,335	
5	Quartz Crushing Mills	Moulins à broyer le quartz	14,000	22	7,720	
5	Railway Car Factories	Fabriques de chars pour chemin de fer	36,000	60	204,000
